Abstract

*The abstract should briefly describe the background, objectives, methodology, key findings, and major conclusions of the study. The abstract should not exceed **250 words** and should not contain references, equations, figures, or tables.*

Keywords: *Maximum 5 keywords separated by semicolons.*

1. Introduction

The introduction should provide sufficient background information, identify the research gap, and clearly state the objectives and significance of the study.
Example citation:

Biomass-based energy systems have gained significant attention owing to their potential for sustainable energy production [1].

2. Materials and Methods

2.1 Materials

Describe all materials, chemicals, reagents, feedstocks, and equipment used in the study.

2.2 Experimental Methodology

Provide a detailed description of the experimental procedures.

2.2.1 Sample Preparation

Describe sample collection and preparation procedures.

2.2.2 Analytical Methods

Describe analytical techniques and standards used.

3. Results and Discussion

It is **mandatory** to have conclusions in the manuscript, which point out the significance of the presented work. Please include quantitative results to strengthen appropriate conclusions. **Avoid writing a second abstract**.

Please do not use references in this Conclusion.

4. Conclusion

Nomenclature

a – mesh size, m
A_{fin} – fin surface area, m^2
L_{ex} – fin extended length, m
L_c – fin length, m
n – number of mesh elements, -
P_l – longitudinal fin pitch, m
P_t – transversal fin pitch, m
r_{in} – outer radius of a plain tube, m
T – fin surface local temperature, K
T_b – fin base temperature, K
T_{cz} – ambient temperature, K
w – fin width, m
x, y – cartesian coordinates
α - heat transfer coefficient, $W/(m^2 \cdot K)$
λ – thermal conductivity, $W/(m \cdot K)$
δ – fin thickness, m
η – fin efficiency, -

Acknowledgments

If applicable, write acknowledgments after the Conclusions section.

Declaration of Competing Interest

The authors declare that they have no known competing financial interests or personal relationships that could have appeared to influence the work reported in this paper.

References

References must be prepared according to the style in the example below

Equations, figures and tables

Equations

Instructions:

- To add equations, copy the borderless table (below) and insert your equation
- Write the equation reference number on the right side and reference as Eq(1)
- Inside the equations, use font Arial, size 9 pt for the main text, if possible
- Format line and text using [Equation] to ensure correct spacing around the equation

$$(\rho_L - \rho_G) \cdot g \cdot V_B = \pi a^2 \frac{\rho_L U_0^2}{2} \cdot f \tag{1}$$

Figures

Figure 1: Short captions of 1-2 lines should be placed below each illustration using

Tables

Table 1: Table title

Heading1	Heading 2	Heading 3
Add rows		

Formatting Requirements

- Paper Size: A4
- Margins: 2.5 cm (all sides)
- Font: Arial
- Title: 16 pt, Bold, Centered
- Author Names: 11 pt
- Main Text: 10 pt
- Section Headings: 11 pt, Bold
- Line Spacing: 1.15
- Paragraph Alignment: Justified
- Figures: Minimum 300 dpi resolution
- Citation Style: Numbered references in square brackets [1], [2-4], [1,3,5]
- File Format: Microsoft Word (.docx)

Example of In-text Citations

- Single reference: *Biomass torrefaction improves energy density [1].*
- Multiple consecutive references: *Several studies have reported similar findings [2-4].*
- Multiple non-consecutive references: *Various approaches have been investigated [1,3,5].*
